Top-Notch Performance

Memorize the scenery seen by your eyes during your ride experiences with top-notch technology. Combination of 14MP CMOS, powerful chipset, and aeronautical GPS unit, allow you to document your journey in video form and let you ride with confidence, security, and memory.

Merge Technology at Its Best

Video image quality depends on 3 elements: lens, sensor, and chipset. DOD Tech combines these three at their very best, providing realistic, fine image for your eyes.

6-Element Glass Lens

Crystal Clear and Natural Images

DOD Tech adopts full glass lens in every model to prevent image distortion and low durability in traditional FRP lens. Through multi-layer filtering technology, images are vivid and natural as seen from your eyes without any deformation and dark edges.

14 MP CMOS

Refined Image Quality

Image quality has always been the main concept DOD Tech is after, HUMMER equipped with 14 mega-pixel CMOS sensor allow recording videos in higher resolution, better details, and more refined form.

Upgraded Processing Chipset

Efficiency Enhancement

The new generation A8+ chipset from DOD Tech is capable of faster processing speed, more powerful performance, to combine images captures by the 6-element glass lens and 14MP CMOS sensor, and result in defined video files of your wonderful journey.

Ready, Steady, Prepared

Exclusive Hummer Mount

1/4 inch drive ball-joint clamp perfectly engages with Hummer bottom stand. Mount clamp is durable and secured via screw, easy to mount on various models and types of motorcycles. Set-and-forget, enjoy your journey.

Durability-Thought-through designed construction with metallic material internally, durable and tough enough to ride with your adventures.

Flexibility-Multi-directional design, two ball-joints allows Hummer to be adjusted to any position you want, to capture the scenery you like.

Stability-Hummer mount is secured by two hexagonal screws which tighten by Allen key included in the package, fasten the clamp tightly on your motorcycle, and prevent falling off from accidental road conditions.

Watertight Power Cords

DOD Tech thoughtfully provides two different power connections, which both are watertight when installed. One uses cigarette lighter socket on your cruiser/tourer, the other provides connection directly from the motorcycle's battery. Quick, easy, and protected.

Waterproof Power Charger

Hardwiring Cable

Be Brave, Challenge to Overcome

Advanced Anti-Shake Technology – Stabilized images with embedded gyroscope

Gyroscope precisely measures position of moving environment in order to calculate required adjustments to eliminate shake caused by road conditions. Hummer is capable of recording steadily even when you are riding an adventurous journey.

Be prepared, take adventures beyond limitation

Linear case design, simple, elegant, waterproof

Streamline design not only blend in with the design of your motorcycle, but also qualified for IPX6 waterproof to prepare for unexpected weather during the trips.

Quality of your memory: Priceless

1080p Full HD Video Quality

Hummer is equipped with 14MP CMOS and capable of 1080p full HD quality, highest resolution of 1920X1080 @ 30fps. Record the scenery as vivid as you see.

110° Wide Field of View

6-element glass lens captures field of view at 110° angle, with crispy clear images and no distortion or fisheye effects. You see it, Hummer records it.

Wide Dynamic Range Technology

Through digital brightness enhancement or reduction, footage of night scenery is as clear as day time while you ride after sundown. WDR technology adjust exposure level through digital calculation and help you memorize your journey.

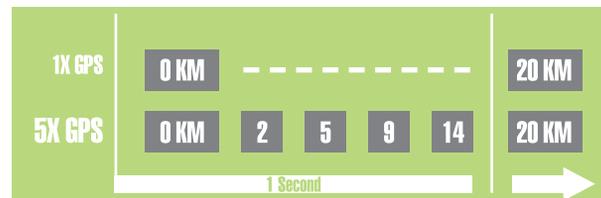

3D Noise Reduction

Full range noise reduction eliminates noises caused during night time, resulting in clean, clear images without digital noise interferences. Along with the WDR technology, combined to produce better image quality.

Aeronautical 5Hz GPS – Locate your position with no delay

Hummer is equipped with 5Hz GPS, faster than others in industry. Positioning 5 times per second, it is more precise than traditional 1Hz unit used in industry. United with Google Maps, you can review your path, know where you have been, and never forget your adventures.

Smart APP at your fingertip

Share your adventure anytime, anywhere

Unique Wi-Fi transmitting function with DOD APP, you can set references or operate the Hummer via your smartphone. Download your journey videos and share with your friends by a few simple touches.

Exclusive DOD APP

Designed for DOD-Tech cams only, simple and easy to use. Through the DOD APP, you can see live-view, change references, or operate the cams via your smartphone with straight forward functions. No more hassle from multiple menus and complicated interfaces.

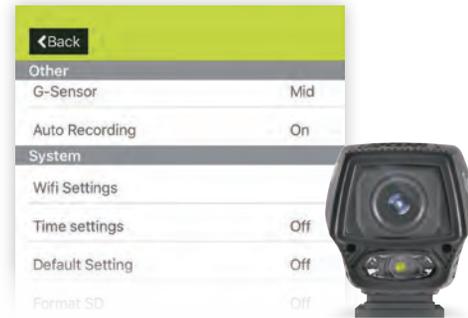

Automatic Connection

DOD APP is designed to be used with ease and convenience. Turn on the Wi-Fi in Hummer and open the DOD APP on your smart phone, and the connection is done automatically (password required for first time connection.) Touch your smartphone screen once to expand the four main functions: record, settings, files, and snapshots.

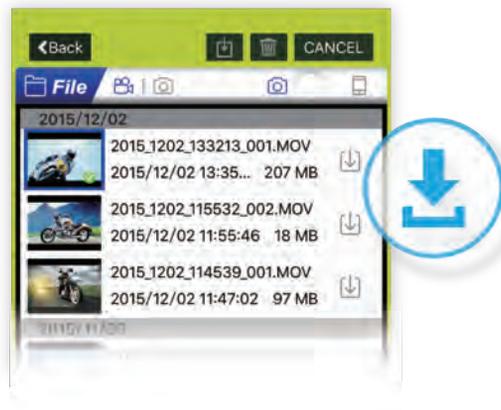

Shortcut to setting references

Set camera references through the DOD APP is quick and simple. From video resolution, mute to G-Sensor sensitivity and more, it is done in a snap.

Transfer files with one simple touch

No longer need a card reader. DOD APP can transfer your video file from the memory card to your smartphone. Download the files you want with a simple touch.

Start or stop at your fingertip.

Simple functions work the best, just one touch to start/stop the recording, and take a snapshot in photo mode also work in the same manner.

Fear the risk?
Not in your adventures

Automatic File Lock

Built-in G-sensor function as a trigger for emergency file lock. Video files are automatically locked down and prevent from over-write if G-sensor detects abnormal shaking or excessive force of impact to keep important footage for your insurance.

Loop Recording Function

Memory card has its limitation with high quality video files, and it is inevitable to run out of free memory space. The automatic loop recording function will overwrite the non-locked files and continues to guard your journey without manual operation.

DOD GPS Player

DOD Exclusive Video Player allows you to view your journey videos and path analysis. All information were recorded and display in details.

Multi-functional Analysis

With DOD Player, you can replay your videos along with travel duration, direction, G-force, average velocity, and more. All data shown in DOD player program in a simple, clear form for you to review.

DOD GPS Player also combines with Google Map to track the paths of your riding experience. Share the route of your journey with other riders at ease.

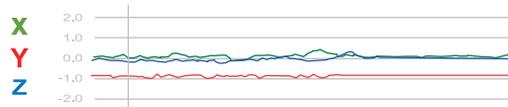

Location, what matters the most

DOD Video Player is able to show vehicle location recorded by 5Hz GPS module any time during the video playback, as well as direction of travel and braking G-force information. The accurate data enhanced the legitimacy for court or insurance use, in order to protect your rights.

G-Sensor Force Detection

G-Sensor is able to detect excessive force in X, Y, or Z axle caused by vibration, hard braking, or external abnormal force of impact. Moreover, video files will be locked down to prevent overwrite function when impact is detected.

Data Accuracy

DOD Video Player will also show travelling speed in the data section, and analysis the highest trap speed as well as the average velocity during the trip. The more data is always better.

Path Tracking

Full path tracking is shown via Google Map for you to review the path you chose in your journey. Through the recorded data in Google Map, you can find a better route for next venture, or share your wonderful path with friends.

Video Resolution	1920 x 1080(30fps), 1280 x 720(30fps), 1280 x 720(60fps) 848 x 480(30fps), 640 x 480(30fps)
Sensor	14 Mega pixels CMOS
Wide Angle Lens	110°
Display	1.5" TFT LCD
Video Format	MOV
Recording Media	Micro SDHC/MMC Card (Up to 32G)
Audio	Mic and Speaker (Mono) Equipped
Battery	3.7V 750mAh Lithium-ion Battery
Power Input	5V 1.5A
Size	110(L) x 52(W) x 56.5(H)mm
Weight	168g
Temperature	-20°C ~65°C
